Executive Summary

Motivated Computer Science and Engineering student with hands-on experience in Python, Machine Learning, Data Analysis, and Full Stack Development. Through my internship at NIT Puducherry, I developed strong problem-solving and teamwork skills by working on real-world AI-based forecasting projects. I am eager to contribute my technical expertise, learn quickly, and deliver high-quality solutions as a Software Developer.

Technical Skills:

- **Programming Languages:** Python, Java, C, C++, JavaScript, SQL
- **Web Technologies:** HTML5, CSS, JavaScript, React.js (Basic)
- **AI/ML Technologies:** TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib
- **Databases:** MySQL
- **Core Computer Science:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **Machine Learning:** Artificial Neural Networks (ANN), Random Forest, Time Series Forecasting, Data Preprocessing, Model Evaluation

Soft Skills:

- Problem Solving
- Communication
- Teamwork & Collaboration
- Time Management
- Adaptability
- Critical Thinking
- Quick Learner

Professional Experience:

National Institute of Technology Puducherry (NIT Puducherry)**AI/ML Intern – Department of Electrical & Electronics Engineering****Duration:** June 2026 – July 2026**Project:** *Machine Learning and Deep Learning-based Ampacity Forecasting in Smart Power System***Responsibilities:**

- Developed machine learning and deep learning models for ampacity forecasting.
- Preprocessed and analysed power system and weather datasets.
- Built, trained, and evaluated machine learning and deep learning models for ampacity forecasting using Python.
- Applied feature engineering and model optimisation techniques.
- Validated model performance using MAE, RMSE, MAPE, and R^2 .
- Documented technical findings and collaborated with faculty mentors.

Technologies: Python, TensorFlow, Scikit-learn, Pandas, NumPy, Google Colab**National Institute of Technology Puducherry (NIT Puducherry)****AI/ML Intern – Power Systems Simulations Laboratory, Department of Electrical & Electronics Engineering****Duration:** December 2025 – January 2026**Project:** *Power System Dynamic Line Rating Forecasting using AI and ML Methods***Responsibilities:**

- Implemented AI/ML models for Dynamic Line Rating (DLR) forecasting.
- Performed coding, simulations, and experimental analysis.
- Cleaned, preprocessed, and analysed meteorological and power system datasets for model development.
- Compared forecasting algorithms to improve prediction accuracy.
- Assisted in research documentation and technical reporting.
- Collaborated with faculty on AI applications in smart power systems.

Technologies: Python, Machine Learning, Data Analysis, NumPy, Pandas, Matplotlib**Education**

Bachelor of Technology (B.Tech) – Computer Science and Engineering
Perunthalaivar Kamarajar Institute of Engineering and Technology (PKIET), Karaikal

2027

Awards & Accomplishments:

-
- Advanced Diploma in Java Programming – G Tech Computer Education, Karaikal (A+ Grade, 91%) | 2023
 - AI/ML Internship Certificate – National Institute of Technology Puducherry | Machine Learning and Deep Learning-based Ampacity Forecasting in Smart Power System | 2026
 - AI/ML Internship Certificate – National Institute of Technology Puducherry | Power System Dynamic Line Rating Forecasting using AI and ML Methods | 2025–2026
 - Head – Media & Promotion Team, leading a team of 29 members (if this were an official college/organization role).
